Sustained Dialogue

Human Relationship-Deficiency Virus (HRV) is the mother of all viruses and leads to Acute Intentional Disengagement of Society (AIDS) and to death. The causal **poverty of relationships** prevents humankind from maximizing our collective intelligence to solve our interrelated crises. The cure is Sustained Dialogue (SD) with its quality of listening-to-learn. SD dignifies, humanizes, and equalizes people. SD leads to creative, just decisions that respect Earth and each other. **SOURCE:** Emmanuel Ande Ivorgba, 22 October 2010, Jos, Nigeria, at <http://traubman.igc.org/nigeriaivorgba.pdf>
