

Calling humankind to a
Decade of Cooperation

2010-2020

**We humans are born onto Earth
one ancient, interdependent, interrelated world
neighbors forever.**

**Today we neglect this reality.
We are not listening to each other or to Earth herself.
Statesmanship and diplomacy are replaced by violent domination,
the predictable failure.**

**The next ten years require increasing citizen compassion and creativity
billions of women and men in millions of endeavors
showing how to live together, with everyone and our living planet.**

**Our power now is in
passing forward the story of each act of cooperation and reconciliation.**

*“People become the stories they hear and the stories they tell.”
- Elie Wiesel*

**Life calls everyone on Earth to
listen
cooperate
tell your story
invent our future
for the good of all.**

By 2020, humankind cooperating and reconciled.
